

HESI® Exam performance

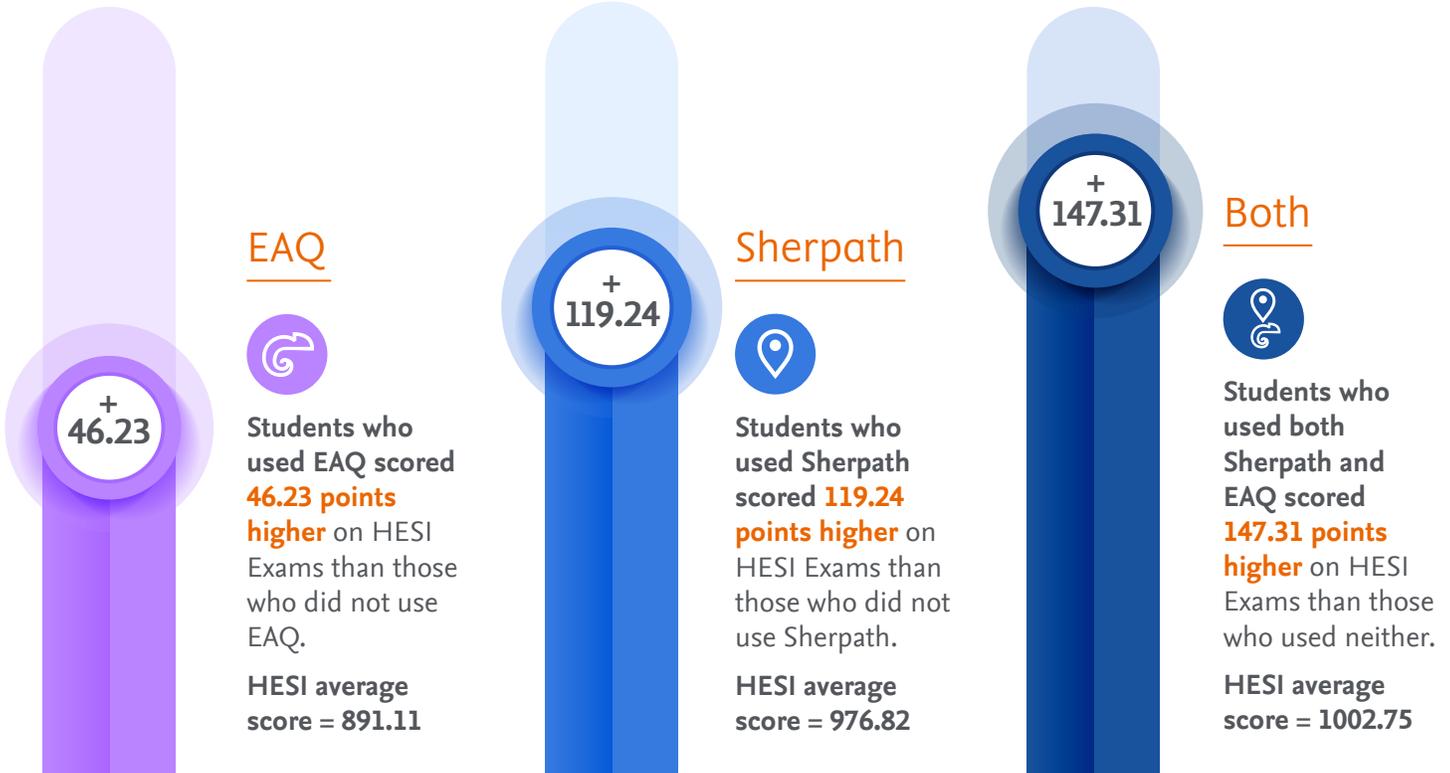

for students who used

EAQ and Sherpath®

217 RN students

A 2023 study of 217 RN students at a private institution tracked the HESI Exam scores of students who used Elsevier Adaptive Quizzing (EAQ), Sherpath, or both as part of their nursing education. Of these students, 45 used only course-based EAQ, 39 used only Sherpath assignments, and 101 used both. We analyzed each student's highest score on HESI Specialty, Custom, and Exit Exams to determine how students who used EAQ and Sherpath performed on the HESI Exams.

*This study does not include the EAQ NCLEX version
