If your program is looking to enhance the clinical decision-making skills of students at all levels, reinforce their classroom knowledge base, bridge the gap between lecture and clinicals, and offer remediation, then look no further than Elsevier’s Simulation Learning System (SLS) for RN 2.0.
Elsevier’s Simulation Learning System for RN 2.0 includes all of the content you need to successfully run simulations across all nursing disciplines:

- **Over 200 simulation scenarios** that correspond to Elsevier’s market-leading texts in each core nursing discipline
  - NEW! Scenarios for community health nursing
  - NEW! Scenarios for leadership/management
  - NEW! Scenario Finder tool that allows searching by concept, patient, and diagnosis

- **Detailed instructions** for preparation and implementation of the simulation experience including direct access to Implementation Modules and Facilitator’s Packets
  - NEW! Moulage Manual with over 86 recipes and full-color photos

- **Debriefing questions** that encourage critical thinking as well as student-facing pre- and post-simulation activities

- **Robust EHR platform powered by SimChart®** that houses patient records for simulation scenarios and skills drills

- **600 skills drills** that give students additional opportunities to practice and master core skills prior to simulation

- **Learning resources** to reinforce student comprehension
  - NEW! Simulation Playground for documentation practice
