Nursing students represent about 50% of all healthcare students.

Employment of registered nurses is projected to grow faster than the average for all occupations through 2029.

The NCLEX measures the foundational knowledge and skills needed for safe practice for entry-level nurses. The Next Generation NCLEX for RN and PN is coming no sooner than April 2023 to address the pressing need in nursing education to produce successful nurses.

Clinical judgment is one of the top five required skills for new nurses entering the field:

- Problem Solving
- Critical Thinking
- Clinical Judgment
- Professional Communication
- Active Listening

The NCSBN Clinical Judgment Measurement Model (NCJMM) supports existing theoretical education frameworks used in nursing education, including:

- Intuitive-Humanistic Model
- Dual Process Reasoning Theory
- Information Processing Model
- The NCJMM

Elsevier is committed to helping faculty prepare students for these changes in the NCLEX and to become better nurses.
