Simulation Learning System with Virtual Reality (SLS with VR)

Offer a totally immersive clinical learning experience with SLS with VR!

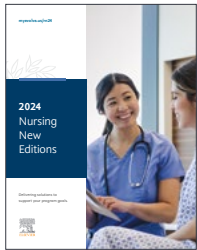

Building on SLS's evidence-based simulation scenarios and activities, SLS with VR leverages the SimX platform and tools to provide branching scenarios spanning the entire nursing curriculum. It's an affordable and low-resource option for giving students simulated clinical experience opportunities to improve their clinical judgment, communication, and decision-making skills in a safe, ultra-realistic environment.

- **Cutting-edge SimX technology combines with world-class Elsevier content** to bring realistic and highly effective VR simulations to the classroom.
- **Easy-to-use facilitator software** allows instructors to moderate students similarly to how they would in a traditional simulation lab, viewing students' actions in VR and managing dialogue between students and the patient and other characters.
- **Pre- and post-simulation activities** include quizzes and EHR exercises for students and debriefing guidance for the facilitator.
