SimChart case studies present patients in an unfolding scenario, where students retrieve and document information. If you are using Course-Based SimChart integrated with Sherpath, the content and quiz questions in the case study align to the content of the course.

NOTES:

- A case study assignment will not show up for the students until its start date. You will see it in your Course Plan.
- The due date is the last day a student will be able to work on the assignment.
- Case studies are graded on the first attempt only. Create a new assignment and reassign the same case study for additional graded attempts.
- Case studies (including reassigned ones) are assigned to the whole class by default, but can be assigned to individual students if needed.

1. To assign a SimChart case study, first enter your course. Your institution may have it hosted on their LMS or the Evolve LMS.
2. Navigate to the Course Plan
3. Click the Add SimChart button that appears in the course plan.
4. The Add a SimChart item page appears with the first step of selecting the SimChart assignment type. Select the Case Study (SimChart) assignment type on the left.
5. On Step 2: Choose content you will see a list of SimChart case studies.

6. Click Quick view at the far right of any case study to preview it.

7. The preview appears with the Assignment name, Patient name and Hospital Floor.
   a. The preview shows the Overview tab, which shows the Diagnosis, Sherpath Module name, Total time limit, Concepts, Learning Objectives, and Grading options.
b. Clicking the **Charts involved** tab shows any relevant charts involved with the case study.

![Charts involved tab](image)

![Phase tab](image)

c. The **Phase** tab shows detailed descriptions of each phase and the desired student actions.

8. You can select the **Demo Case Study** button toward the top left of this panel...

![Overview, Phase Instructions, and Quiz Questions](image)

a. ...and scroll to see more detailed versions of the **Overview, Phase Instructions, and Quiz Questions with answers.**
b. You can also see the charts involved by clicking on the **Charts involved** tab at the top of any **Phase** section.
9. Returning to the top of the demo pane, you can click the **Switch to Student View** button at the top right to see the assignment as a student would.

10. Click the **Back to Quick View** close icon in the top left to return to the detailed view.
11. Next in the top-left corner of each screen, click **Back** to return to Quick view, then **Close** to return to the list of case studies.
   
   a. **NOTE:** If you click **Select this Case Study** (to the right of **Demo Case Study**) before closing, it will select the **radio button** to the left of the case study on the main screen.

12. Back on the **Choose content** list view, select the radio button to the left of the desired **case study** (if not already selected), and click the **Next: Configure item** button at the bottom right to configure the assignment.

13. On the third and final **Configure item** step, the **Display Name** field prepopulates, but if desired you may click it to enter a different **Display Name** you and your students will see.
14. Continuing down the page, set **when students will see this assignment** and **the due date and time**.

**NOTES:**
- A case study assignment will not show up for the students until its start date.
- Case studies are assigned to the whole class by default; however, you can select individual students for the assignment, if desired

15. Next, select a **Grading** option of **Not Graded**, **Pass/Fail**, or **Scored**.

**NOTES:**
- The grading options are flexible so you can assign case studies for practice, simple completion, or for a scored numeric grade based on the accompanying quiz.
- Case studies are graded on the first attempt only. Create a new assignment and reassign the same case study for additional graded attempts.

16. Click the **Save and Complete** button at the bottom right to complete the setup.

17. You are returned to the **Course Plan** screen.

18. You have successfully assigned a SimChart case study in your Sherpath course. You are now finished.

**END OF GUIDE**
