

Elsevier eBooks on VST: Downloading Your Library (Windows)

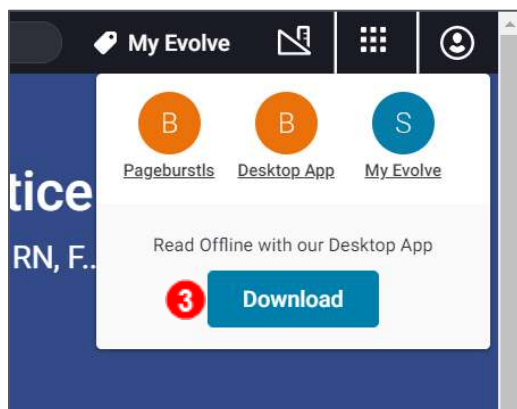

1. To download your Elsevier eBooks, start by logging into your Evolve account and clicking into the **Go to VitalSource Library** link in you My Content list.

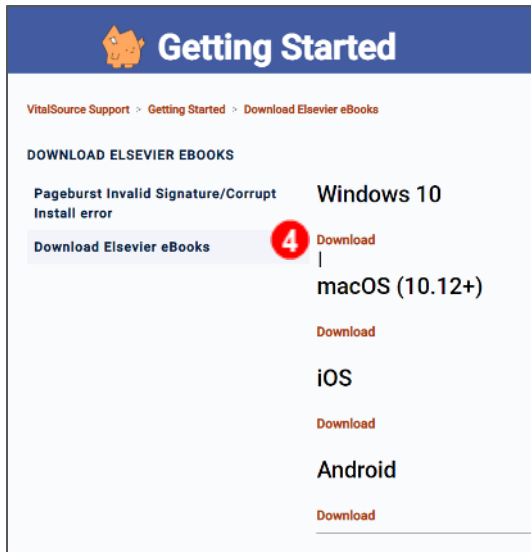

2. Your library will load. Click the **App icon** in the upper-right corner of the page.

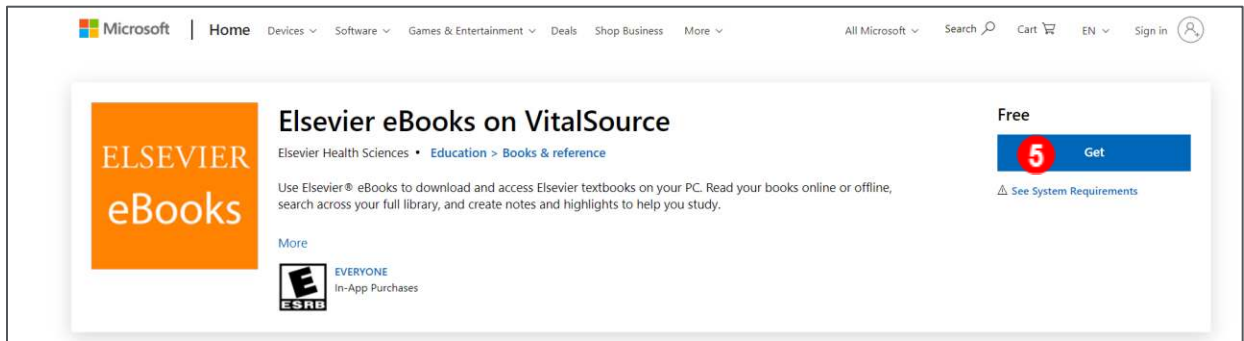

3. Click the **Download** button.

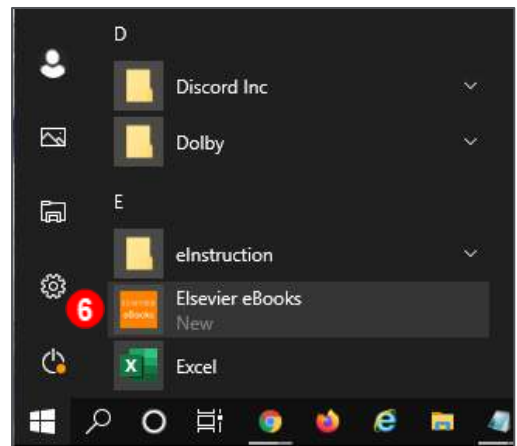

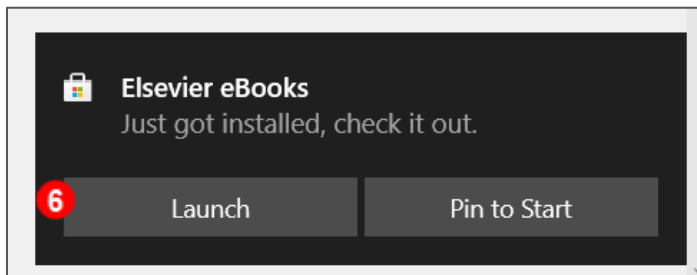

4. Click **Download** under Windows 10.

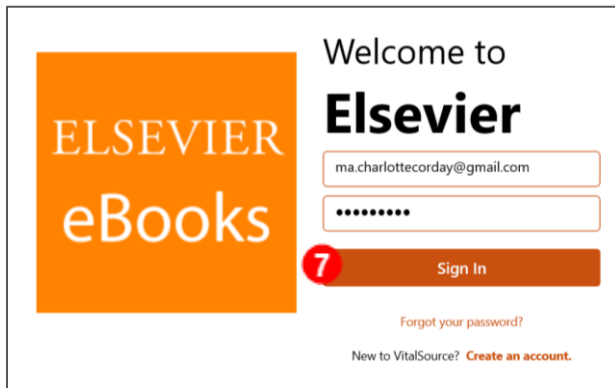

5. The Microsoft Store will open and display the Elsevier eBooks on VitalSource app page. Click **Get** on the right side of the page.

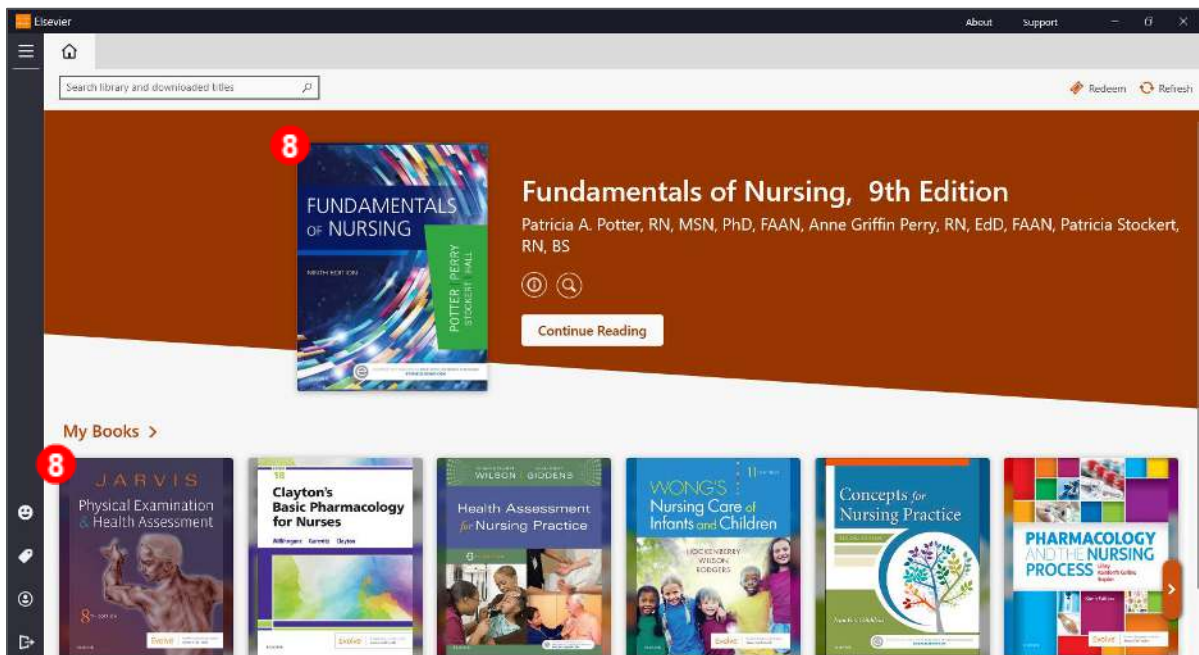

6. The app will install and give you an option to launch it or pin it to Start. The app can also be launched from your Start menu.

- When the Elsevier eBooks app first launches, you will be asked to sign in with the e-mail address and password from your VitalSource account. Please note that the password may be different from your Evolve account.

- Once you have signed into the app, you will remain signed in. The app will list your books by front cover. **To open a book, click the cover image.** If the book has not been downloaded, the download will begin. Once a book has been downloaded, it will open instantly.
