

# Creating Graded Evolve Assignments in Canvas

Introduction: This guide will walk you through creating graded assignments in Canvas.

**NOTE:** There are 4 types of products that have assignments that can be linked to Canvas using these steps: **Clinical Skills, Elsevier Adaptive Learning**, and select versions of **Evolve Resources, and Online Courses**. In Evolve resources and online courses the only assignments that will pass directly to the gradebook will be inside of a folder marked as gradable resources.

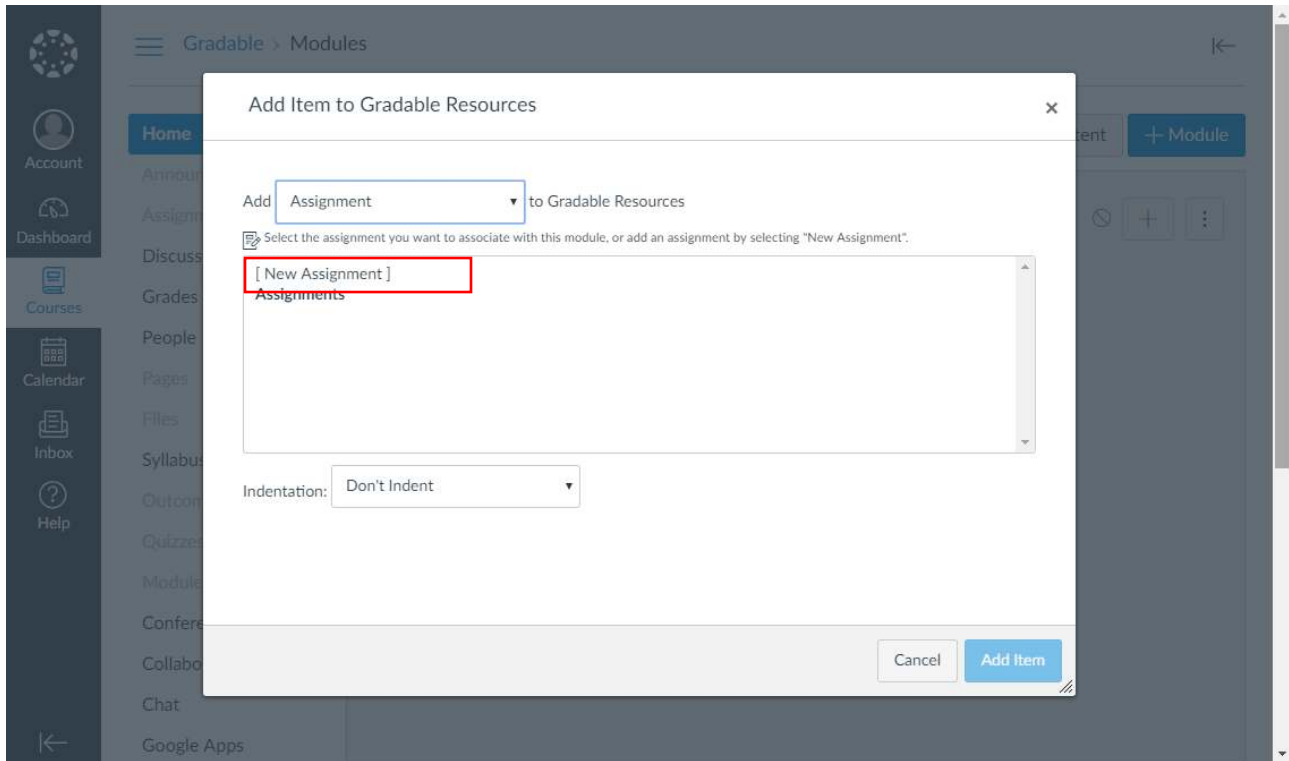

## External Tool Setup

1. Login to Canvas and go to your desired course.
2. Click the + button in the upper-right-hand corner in the module you desire.

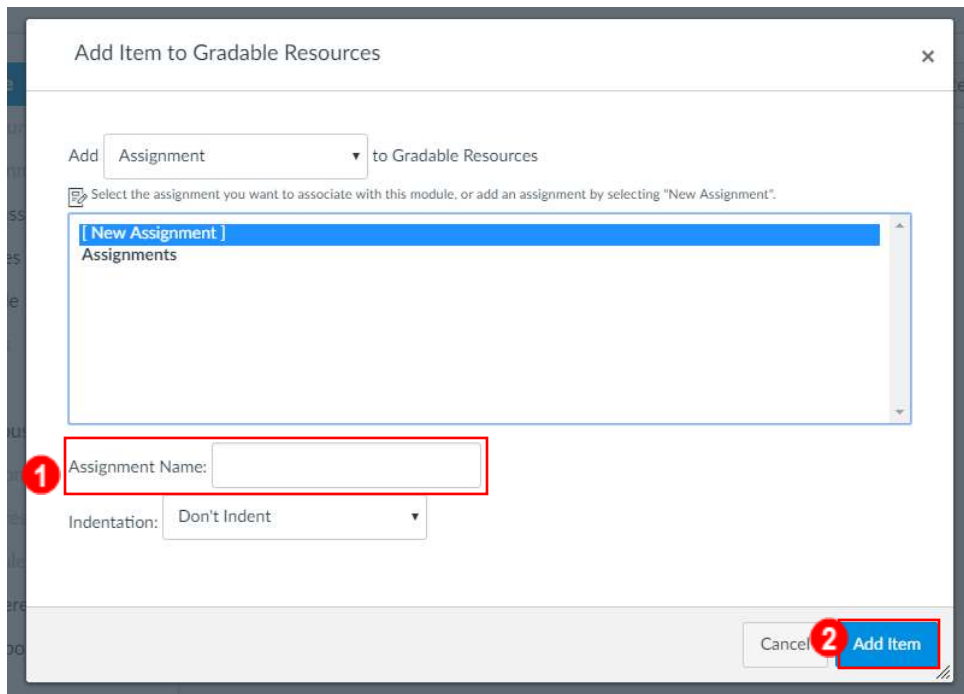

The screenshot shows the Canvas LMS interface. On the left is a dark sidebar with navigation icons for Account, Dashboard, Courses, Calendar, Inbox, and Help. The main content area is titled 'Gradable > Modules'. At the top right of the main area are buttons for 'View Progress', 'Export Course Content', and '+ Module'. Below these buttons is a list of modules. The 'Gradable Resources' module is expanded, showing a sub-section with a red box around the '+' button and a vertical ellipsis menu button.

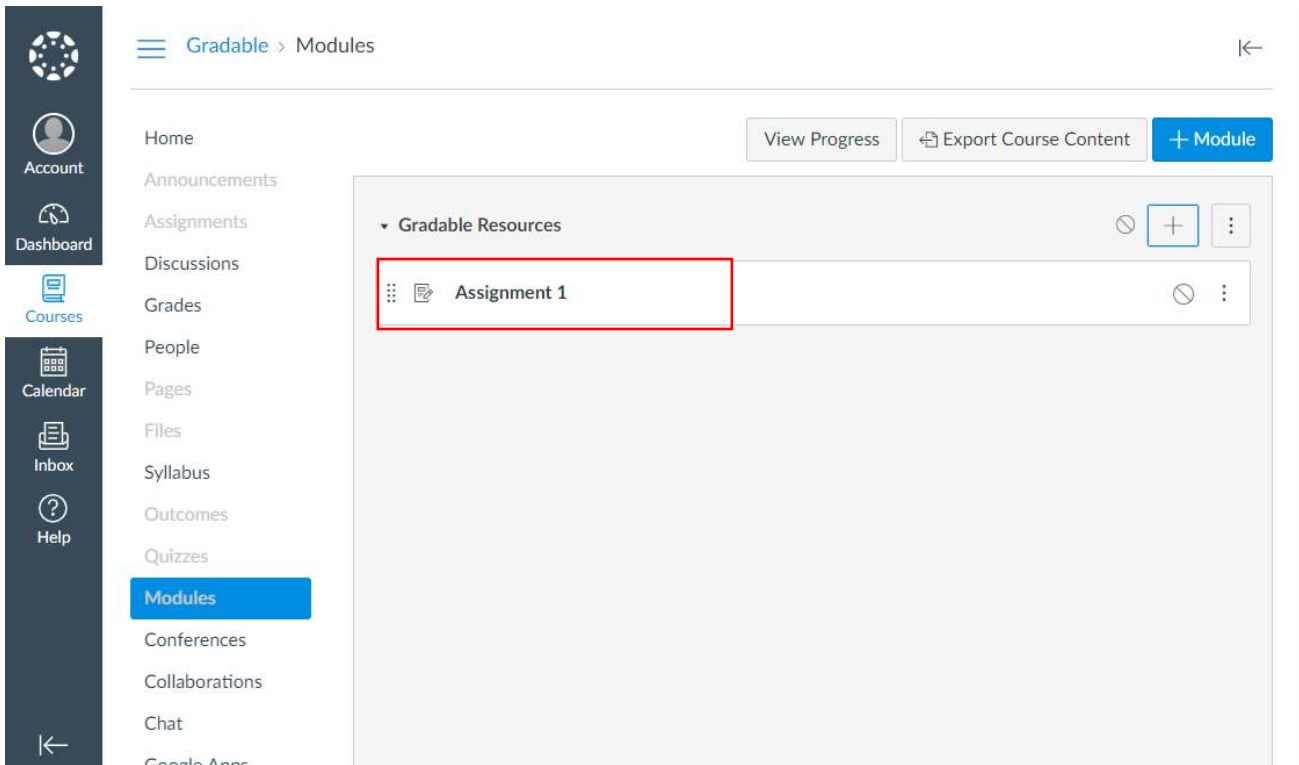

3. Click [New Assignment].

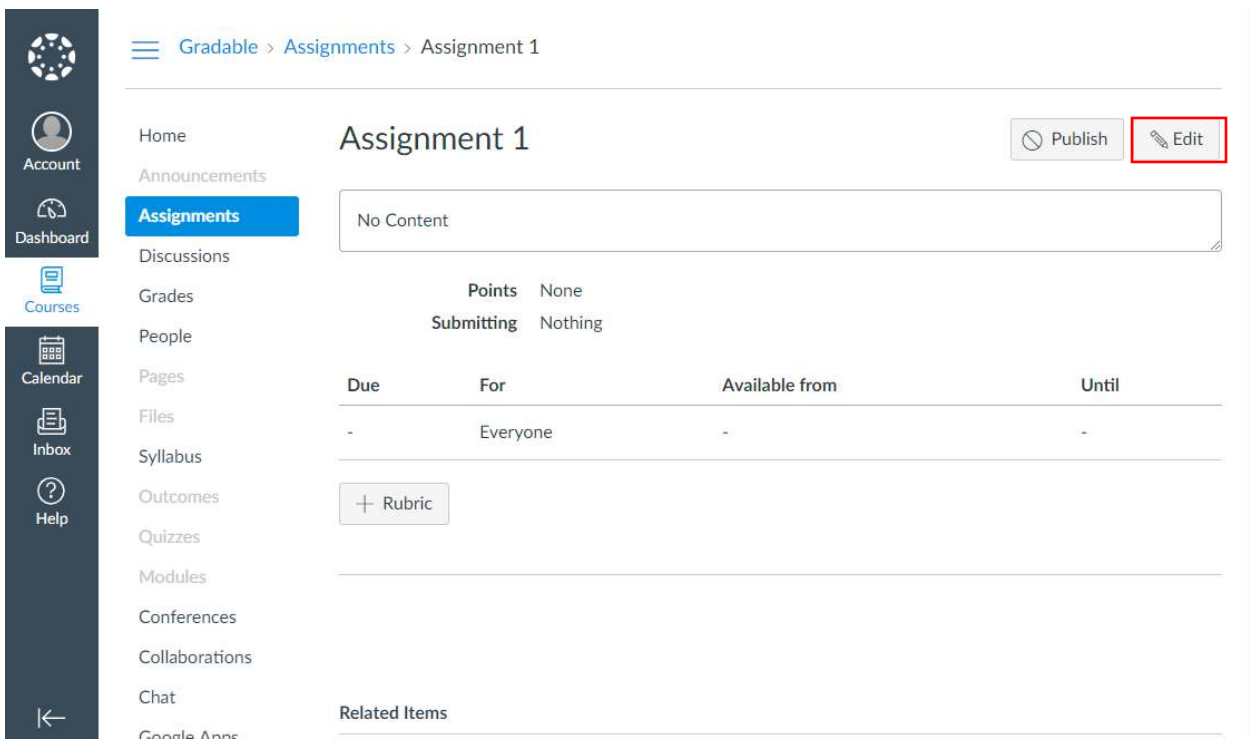

4. Name the assignment as desired and click Add Item.

5. Click on the **title** of the assignment you just made.

6. Click **Edit** in the upper-right-hand corner.

7. Scroll down and change **Submission Type** to **External Tool** and click **Find**.
