

HESI[®] Readiness for NCLEX[®] Dashboard

Gain timely insights into students' NCLEX readiness, starting with their first HESI Specialty Exam

Elsevier's HESI Review & Testing solution is backed by more than 20 years of peer-reviewed research studies that highlight its effectiveness. Specifically, the HESI Exit Exam continually proves to be a reliable predictor of NCLEX-RN[®] success, with a history of up to 98% accuracy. This inspired us to leverage that research, coupled with data science techniques, to deliver a dashboard that presents early and actionable insights to help you make evidence-based decisions.

The HESI Readiness for NCLEX Dashboard empowers you to:

Determine NCLEX-RN readiness by tracking student performance throughout the curriculum, starting with the first HESI Specialty Exam.

Identify at-risk students early, based on a prediction model backed by extensive research.

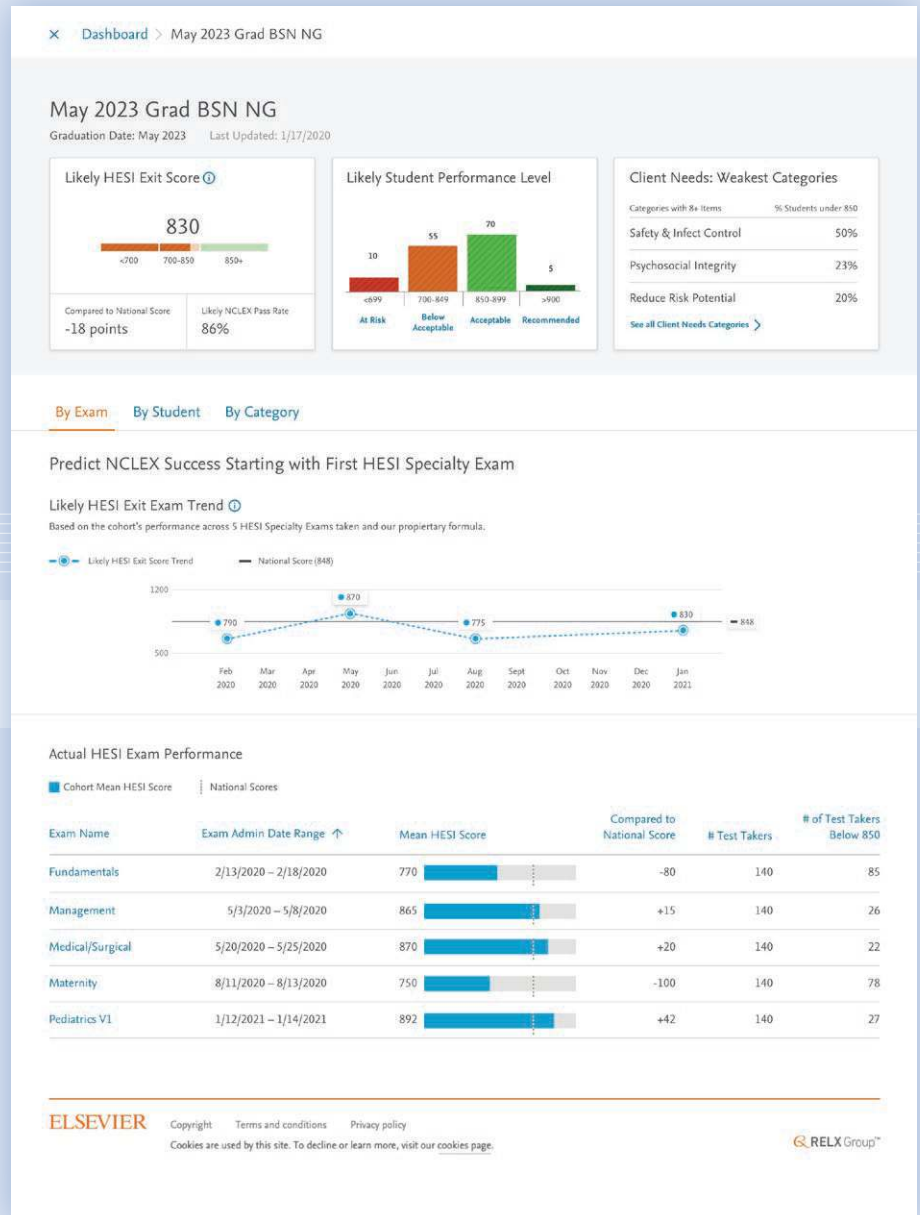

Monitor cohort- and student-level progress and trends that indicate the likelihood of NCLEX success.

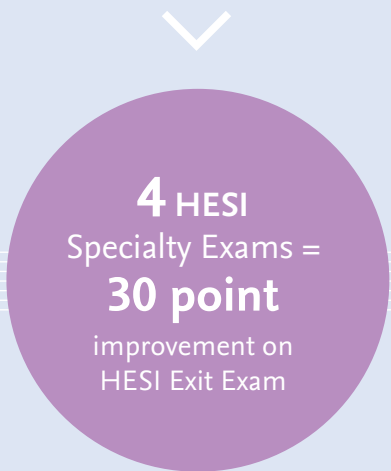

Improve program outcomes to enable curricular enhancements and student interventions to increase NCLEX pass rates.

HESI® Readiness for NCLEX® Dashboard

Early curricular insights for
long-term student success

Students who take **more HESI Specialty Exams** throughout their program **score progressively higher** on the HESI Exit Exam:
