

DCEs part of wider program solution

At Shadow Health, faculty and students are our top priority. That's why we're so happy to share that since Shadow Health joined the Elsevier family in December 2020, there are exciting new opportunities for whole class and whole curriculum solutions. A global leader in Nursing and Healthcare education, Elsevier delivers the very best learning and assessment offerings for your students.

And joining forces with Elsevier also

means we will be able to accelerate development of new Digital Clinical Experiences for your students. Look out for our Medical Surgical Nursing DCE in late Spring 2022.

As you prepare for next semester and beyond, remember that you are now able to package your Shadow Health simulations with valuable resources including Elsevier Adaptive Quizzing (EAQ), Sherpath, HESI, textbooks, and SLS with VR. We are also now proud to offer additional

ways to connect to Shadow Health, including through Elsevier's Evolve platform.

Our nurse educators and instructional designers are ready to meet with you to discuss how our broad library of educational solutions can enhance your curriculum and support your program goals. We're confident you'll find resources that are a perfect complement to Shadow Health's digital standardized patients. To learn more, **get in touch** today.

Share your insights: Complete the Fall 2021 course survey today

We are constantly making improvements to our digital patient simulations, and many of our best ideas come from our faculty!

Are there new features, buttons, or options you would like Shadow Health to develop? Dreamed of a different type of simulation that would be beneficial to your students? Do you have feedback about which parts of our interface we should work to improve? In the survey,

we'll also ask if there are professional development opportunities that might interest you and what your experience has been working with Shadow Health's Customer Success managers.

With your help, we can continue to make the student and instructor experience even better.

Please share your thoughts on our **2021** course survey today.

We want to hear from you!
