

HESI® Legacy (iNet): Taking a HESI Legacy Exam on an iPad

Install the HESI Secure Browser

Before taking a HESI NG exam on an iPad, you will need to download the **HESI Secure Browser** from the **Apple App Store**. This is the app that you will use to launch and take your exam.

Run a Compatibility Check

You will also need to run a system compatibility check to make sure that your device will be able to load your exam. This can be found at hesiinet.elsevier.com under the **Compatibility Check for Labs** section.

Once the compatibility check launches, it will immediately check that your iPad meets the recommended settings. The page will list anything that did not pass the check.

There is also a **mock exam** available that will launch a demo exam in your Secure Browser app. If you are able to run this successfully, your iPad is configured properly.

Taking the Exam

When the time comes to take your exam, open the **HESI Secure Browser** and sign in using your Evolve username and password. Your instructor will provide the access code for the exam.
