

# NEXT GENERATION NCLEX<sup>®</sup>

By the Numbers

In 2019, registered nurses held about

## 3.1 million jobs in the United States

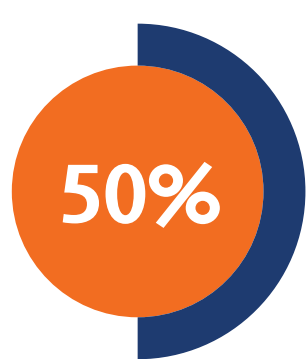

Nursing students represent about 50% of all healthcare students.

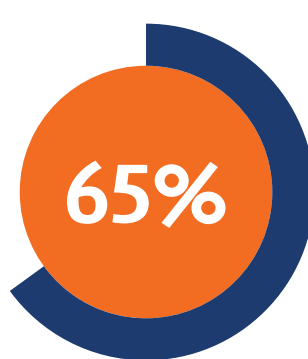

Employment of registered nurses is projected to grow faster than the average for all occupations through 2029.

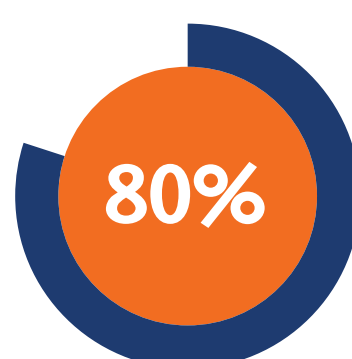

The NCLEX measures the foundational knowledge and skills needed for safe practice for entry-level nurses. The Next Generation NCLEX for RN and PN is coming no sooner than April 2023 to address the pressing need in nursing education to produce successful nurses.

of entry-level nurses were involved in practice errors

of entry-level nurse errors were related to poor clinical decision-making

of employers were dissatisfied with the decision-making abilities of entry-level nurses

Clinical judgment is one of the **top five required skills for new nurses** entering the field:

Problem Solving

Critical Thinking Skills

Clinical Judgment

Professional Communication

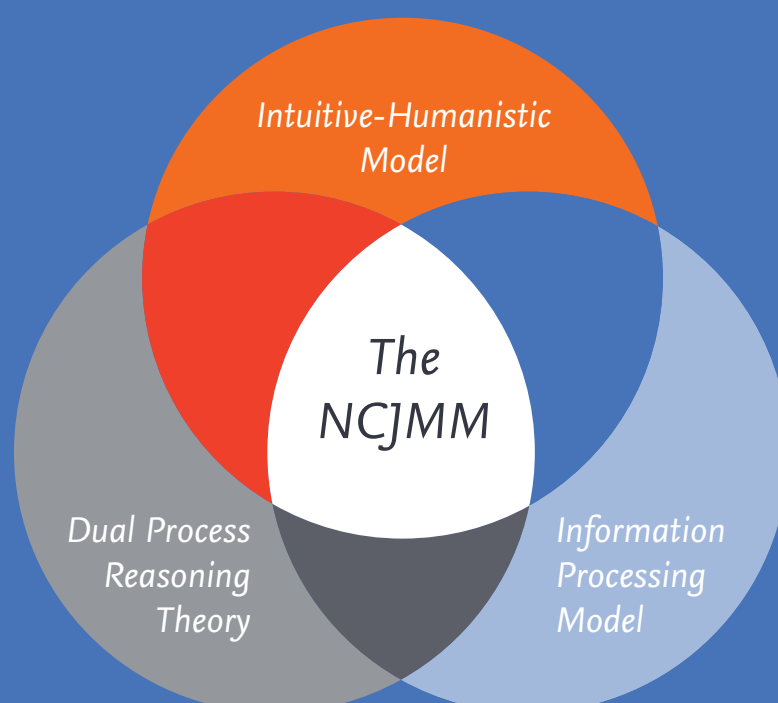

Active Listening

The NCSBN

## Clinical Judgment Measurement Model (NCJMM)

supports existing theoretical education frameworks used in nursing education, including:

Elsevier is committed to helping faculty prepare students for these changes in the NCLEX and to become better nurses.
